EDUCATION

Bachelor of Engineering (B.E.)
Assam Engineering College

08/2016 - 08/2020   *78.9%*

Computer Science and Engineering

- Roll No-187667 of 2016-17

Higher Secondary
Gurukul Grammar Senior Secondary School

2015   *90.8%*

Science

- Roll No – 3623739

High School Leaving Certificate
Gurukul Grammar Senior Secondary School

2013   *9.2 CGPA*

Class-X

- Roll No – 3130266

WORK EXPERIENCE

Software Engineer
GlobalLogic India Pvt. Ltd.

09/2022 - Present   *Bangalore*

Projects and Activity

- Underwent training on Java Stack.
- Worked on creating a Job Portal. I mostly worked on Email service which sends a signup and job applied mails to recruiters and jobseekers. Used rabbitmq for communication between services.

Programmer Analyst
Cognizant Technology Solutions

11/2021 - 09/2022   *Work From Home*

Projects and Activity

- Worked on a new Data Privacy Project. Created API connectors whose endpoints are exposed to the BigID tool. This API connector are created using SpringBoot which connects to the data source endpoints, gets the information, then filters the results and returns to BigID.

Programmer Analyst Trainee
Cognizant Technology Solutions

12/2020 - 11/2021   *Work From Home*

Projects and Activity

- I worked on a Data Privacy Project after undergoing training on using the BigID tool. Performed upgrade of BigID tool in PROD, DEV and UAT Servers using Docker and Unix commands.
- I was trained in technologies like Core Java, Restful Web Services, Unix & Shell Scripting and MySQL

SKILLS

Java   Springboot   BigID   MySQL

Angular   AWS   HTML   Javascript   C++

PERSONAL PROJECTS

Pension Management System

- Created the frontend using Angular. The frontend contains Home, Login, Search, Pensioner Details pages.
- The backend is developed using SpringBoot. It contains 3 services - Pension Process, Pensioner Detail and Authorization service. Authentication is done by creating a JWT token.
- The 3 microservices are deployed in AWS cluster using Fargate. Also created a CICD pipeline for building and deploying docker images to the Cluster.

Generating Images From Text Description Using GAN

- This is my second final year project. A deep learning project developed using Python language.
- It takes a description of the flower as input and creates an artificial image of a flower according to the description.

Tea Leaf Disease Detection Using Deep Neural Networks

- This is my first final year project. A deep learning project developed using Python language.
- Trained a machine learning model to correctly identify whether a tea leaf is diseased or healthy; and if diseased then classify it into one of the 2 diseases in the learning set.

CERTIFICATES

Java for Beginners
Udemy - UC-S5V6VUGP

Docker in AWS - Deploy Java Spring Boot to AWS Fargate & ECS
